Leader Headlamp Protector Installation Instructions

1. Choose the appropriate Leader Headlamp Protector part number. (see instructions below)
2. Thoroughly clean the headlamp with household glass cleaner and dry with a lint free cloth.
3. Cut the Leader Headlamp Protector film (with release paper in place) approximately ½ inch larger than the headlamp. A paper template of your headlamp may assist in this step. To cut the Leader Headlamp Protector use a razor knife (Olfa or X-acto).
4. Remove the paper backing, avoid contact with the adhesive.
5. Apply Leader Headlamp Protector by pressing the film to the headlamp (see figure 1). Use a radial motion, starting at the center and moving to the edges of the headlamp. This technique will remove air bubbles. A hair dryer can be used to warm the headlamp and the protector to assist in the application.
6. Trim the excess protector from around the perimeter of the headlamp with a razor knife (see figure 2). Cut around headlamp alignment tabs as required.
7. Allow adhesive to set at least 72 hours before washing the vehicle. Residual cloudiness will dissipate in a short period of time.
